# GenPDFAddOnDemo (L1 Heading)

This is a sample document to show what can be achieved with the GenPDFAddOn Plugin.

- Generate a PDF of this page
- Generate a PDF of this page and child topics. *Note that each L1 heading and each Child topic is a separate chapter in the PDF.*
- Generate a PDF with auto header shifting *Only L1 headings become chapters. Child topics are properly indented.*
  - ◆ Note that the GenPDFAddOnDemoForm topic will start a new chapter - it contains the `<!-- TOC PROMOTE -->` comment.

Here are some headings - note that `<h1>` level 1 headers always appear on a new page and is treated as a new chapter in the PDF. So the Level 1 heading is not included to avoid the extra chapter.

## Level 2 Heading

### Level 3 Heading

#### Level 4 Heading

##### Level 5 Heading

###### Level 6 Heading

Foswiki only goes this far 😊 HTMLDOC goes to level 15 😊

Level 7 Heading

Level 8 Heading

Level 9 Heading

Level 10 Heading

Level 11 Heading

Level 12 Heading

Level 13 Heading

Level 14 Heading

Level 15 Heading

## Features

Some of the cool features are:

- Title topic is a fully rendered Foswiki topic, editable from within Foswiki's normal edit mechanism.
- Headers/Footers are fully rendered Foswiki variables embedded in HTMLDOC special comments, but defined in a normal Foswiki topic.
- Images are included
- Margins can be defined
- PDF permissions can be restricted (this has 'print,no-copy' so you can't copy and paste the text)
- Recursive rendering of child topics, such as GenPDFAddOnDemoChild

## Limitations

There are a few limitations, like

Really long lines of text in verbatim blocks will run off the edge of the page unless you break

### Overflowing tables

Tables\_can\_overflow\_if\_you\_have\_long\_words\_in\_the\_cells If\_you\_generate\_a\_page\_for\_the\_GenPDFAddOn\_to

## Settings for this topic

This topic includes the following settings:

## GenPDFExampleHeaderFooterTopic

This page defines the headers and footers for documents generated by GenPDFAddOn. See the HtmlDoc documentation for more info.

If you want an image in the headers, specify it like this:

```
<!-- HEADER LEFT "$LOGOIMAGE" -->

<!-- PDFSTART -->
<!-- HEADER LEFT "%BASETOPIC%" -->
<!-- HEADER CENTER "%FORMFIELD("DocumentClassification" topic="%WEB%.%BASETOPIC%")%" -->
<!-- HEADER RIGHT "&copy; Your Company %WEB%" -->
<!-- FOOTER LEFT "%REVINFO{"r1.$rev &shy; $date &shy; $wikiusername" web="%WEB%" topic="%BASETOPIC%" -->
<!-- FOOTER CENTER "" -->
<!-- FOOTER RIGHT "$PAGE(1)" -->
<!-- PDFSTOP -->
```

# Form Definition for PDF Classification

<!-- TOC PROMOTE -->

Name:	Type:	Size:	Values:	Tooltip message:
			Describe the Security sensitivity of this document For example:	
	label		<ul style="list-style-type: none"> <li>• <b>CompanyConfidential</b> - Internal use only</li> <li>• <b>GeneralAvailability</b> - Acceptable for general distribution</li> <li>• <b>CustomerProprietary</b> - Confidential document of an external customer</li> </ul>	
DocumentClassification	select+multi label	5	,CompanyConfidential, GeneralAvailability, CustomerProprietary	Classify the package
DocumentType	Select+multi label	5	,HowTo, General, FAQ, Documentation A simple description of the document	Identify the type of document
TopicHeadline	text label	60		This becomes the PDF "Subject" field.
KeyWords	text label	60	KeyWords that identify the document	These keywords will be assigned to the PDF.
