

# GEONETCastRecorder

## -decide what matters most-

Andres Westermann  
Christoph Mülligann  
Damian Lasnia

# Motivation

- Which data should be stored?
  - Storing all data yields data storage problems
  - Storing specific data may lead to unused service

## **Solution**

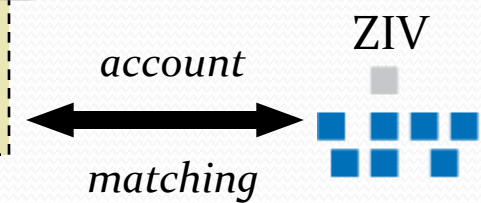

Service that provides data on demand only

# Idea

- Build a request based service for geographic information
- A service that provides only data the user really needs
- No W\*S: no persistent information is offered

Web

Interface

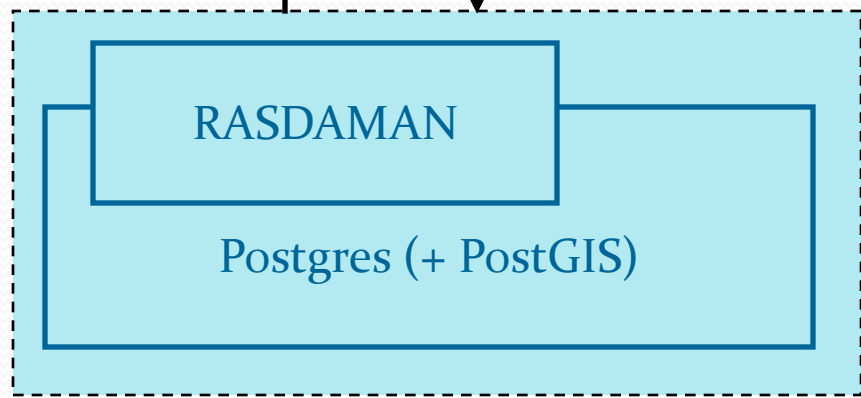

requests ↓ JSP ↑ notifications, images  
jetty

Middleware

Data

Management
